Summary

I'm Chidesh, a 2nd-year AI & Data Science undergraduate with a strong passion for creativity and problem-solving. I enjoy exploring new ideas and applying my skills to real-world challenges. My short- term goal is to secure a role in a reputed company to gain hands-on experience, and my long-term vision is to become an entrepreneur who builds impactful tech solutions.

Skills

Python | Java | Machine Learning | Deep Learning | MS-Office | Power BI | Stock- Marketing | HTML & CSS

Project Experience

NexRide-Tracking App
Founder & Developer
Sep 0 - Present | Erode, Tamil Nadu

Created and managed a multi-service travel app concept. Conducted user research and defined key features. Designed marketing strategy, branding, and presentation. Coordinated UI/UX structure and product roadmap. Ensured consistent brand and product messaging.

Ethintix – AI Email Fraud Detection System
Founder & Devoloper
2025 - 2029

- Built an AI-based system that detects fraudulent, phishing, and manipulative emails using NLP and sentiment analysis.
- Trained models on 5 lakh+ Enron emails to identify tone, intent, and abnormal sender behavior.
- Integrated Gmail/Outlook OAuth for secure email scanning and real-time fraud alerts.
- Developed a lightweight extension + dashboard for quick risk analysis and user verification.
